Associate Researcher at GRASP Lab - University of Pennsylvania

Department of Mechanical Engineering and Applied Mechanics
School of Engineering and Applied Science

University of Pennsylvania
Philadelphia, PA - U.S.

SUMMARY

Control Systems Engineer with 6 years of experience in the formal design, development, and experimental validation of control systems for climate change applications. Strong background in system modeling, simulation, and data analysis using formal methods, MATLAB/Simulink, Python, and physics engines. Proficient in programming and experience with a variety of communication protocols. Experience in project management and leading cross-functional teams. Proven track record of delivering projects on time and of scientific communication. Interested in exploring new technologies and methods to deploy multi-robot systems in complex environments.

Keywords:

Distributed Dynamical Systems
Control Theory

Automation & Robotics
Networking Systems

Nonlinear Systems
Data Analysis

EXPERIENCE

Research Associate

Aug. 2021-Present

General Robotics, Automation, Sensing, & Perception (GRASP) Lab at UPenn

- Designed and implemented optimization-based control strategies for multi-robot systems subject to stochastic communication.
- Designed new stochastic mathematical representations to perform task allocation for teams of robots and to control their mean and variance across tasks in challenging environments.
- Experimentally validated algorithms for marine applications using surface vehicles for modeling complex phenomena in a water tank.
- Developed algorithms that combine Model Predictive Control, Machine Learning, and Adaptive Control techniques to control Unmanned Aerial Vehicles.
- Experience with control systems design, mathematical modeling, and robotic control algorithms.

Research Scholar

Aug. 2017-May. 2021

Control, Automation, and Robotics Lab at Universidade Federal de Minas Gerais

- Developed formal methods to control multi-robot systems subject to dynamical constraints on their communication channels and actuation.
- Developed new sufficient conditions as optimization problems to access the stability properties and to design stable controllers for systems with multiple robots.
- Formulated formal methods to evaluate the stability of nonlinear interconnected Euler-Lagrange systems.
- Validated control algorithms with virtual simulations of aerial vehicles and robotic manipulators.
- Simulated algorithms in Python and performed computational tests using physics engines Gazebo and CoppeliaSim with ROS.
- Experience with control systems design, mathematical modeling, and robotic path planning algorithms.

Research Scholar

Jan. 2014-Dec. 2016

Universidade Federal do Tocantins

- Designed, implemented, and experimentally evaluated band-pass filters in the microwave frequency (3.5GHz - 5GHz) in parallel-coupled transmission lines.
- Developed and implemented auxiliary methods in C++ to design power transformers, considering running losses.

SKILLS

Programming: Python, MATLAB, C++, C, Julia, Git, Linux, Latex.

Office productivity suite: Microsoft Word, Excel, Powerpoint, InkScape, Adobe Illustrator.

Robotics: ROS, GAZEBO, CoppeliaSim, OptiTrack, Control Systems.

Hardware Implementation: Raspberry Pi, Arduino, MSP-430, PIC32.

Languages: Portuguese: First Language; English: Advanced (*Score TOEFL iBT 102/120*); German: A1.

EDUCATION

Ph.D. in Electrical Engineering

May 2021

Universidade Federal de Minas Gerais (GPA 4.0)

Thesis: *Analysis and Design of Distributed Protocols for Multi-Agent Systems Subject to Input Saturation and Time-Varying Delays*

M.Sc. in Electrical Engineering

Apr. 2019

Universidade Federal de Minas Gerais (GPA 4.0)

Dissertation: *Consensus in Multi-Agent Systems with Input Saturation and Time-Varying Delays*

B.Sc. in Electrical Engineering

Jan. 2017

Universidade Federal do Tocantins - High Honors (GPA 4.0)

MENTORING

Postdoctoral mentorship at University of Pennsylvania

Urara Kono (Ph.D. Student, 2022 — Current)

Victoria Edwards (Ph.D. Student, 2022 — Current)

Li Shen (Masters Student, 2021 — 2022)

PUBLICATIONS IN PROGRESS

PRESENTATIONS AND TALKS

Silva, T. C., Souza, F. O., & Pimenta, L. C. A. (2018). *Consenso em sistemas multiagentes sujeitos a saturação e atrasos variantes no tempo*. Oral presentation delivered at the Congresso Brasileiro de Automação, 1-8.

Freitas, S. C. L., Silva, J. C., **Silva, T. C.** (2015). A New Contribution to the Calculation of Losses in Transformers in Function of Magnetic Flux Density. Oral presentation delivered at the XI Latin American Congress on Electricity Generation and Transmission, 2015, Guaratinguetá. Proceedings and Book of Abstracts of The 11 th Latin-American Congress on Electricity Generation and Transmission - CLAGTEE2015. p. 176-176. ISBN: 978-85-61065-02-7

Silva, T. C., Freitas, S. C. L., Oliveira, P. S., Torres, P. R. (2015) *Aplicativo para dispositivos móveis como ferramenta educacional auxiliar ao projeto de transformadores monofásicos e trifásicos*. Oral presentation delivered at the XI Latin American Congress on Electricity Generation and Transmission, 2015, Guaratinguetá. Proceedings and Book of Abstracts of The 11 th Latin-American Congress on Electricity Generation and Transmission - CLAGTEE2015, p. 176-177. ISBN: 978-85-61065-02-7 (Published in Portuguese.)

TEACHING EXPERIENCE

Universidade Federal de Minas Gerais

Teaching Assistant, Digital Systems Design and Practice

1st and 2nd semester of 2020

Universidade Federal do Tocantins

Teaching Assistant, Principles of Electromagnetism

1st semester of 2016

Teaching Assistant, Differential Calculus

2nd semester of 2015

Teaching Assistant, Linear Algebra

1st semester of 2015

SCHOLARSHIPS

Coordination for the Improvement of Higher Education Personnel (CAPES)

2017-2021

National Fund for the Development of Education (FNDE)

2014-2016

Undergraduate Teaching Assistant Scholarship

2015-2016
